

ALL TERRAIN VACUUM TANK

Shown with optional tracks

This vacuum tank is designed for clean up operations in remote locations or where smaller quantities of liquids need to be recovered. It can be used with the Elastec MiniVac, All Terrain Vac or other vacuum pumps.

The tank is fitted with offroad tires or as an option, tracks can be fitted. The low center of gravity and weight means most larger ATV and Utility Vehicles can tow it off road. The optional tracks help with soft ground, snow or sand.

The tank can be removed from the chassis allowing the chassis to be used as a trailer for other equipment such as diesel hydraulic power units.

Specification

Vacuum Tank Capacity:	110 Gallon / 378 litres, fully welded aluminum construction
Chassis Bed Dimensions:	63 x 27 inches / 1.6 x 0.68m, max payload 3,000 lb / 1,361 kg
Weight:	738 lb / 335 kg empty - 1,665 lb / 755 kg full
Length:	9 ft 10 inches / 3 m with tow bar extended (8 ft / 2.44 m retracted)
Width:	5 ft / 1.5 m max (with optional tracks installed)
