

ELASTEC

Grooved Disc Skimmers

Oil Spill Equipment | Floating Barriers | Incinerators

X150 and Launching System

The **ELASTEC X150** is an advancing Grooved Disc skimmer that features the breakthrough oil skimming technology of our 64-disc prototype that won the Wendy Schmidt Oil Cleanup X CHALLENGE by recovering 4,670 gallons of oil per minute.

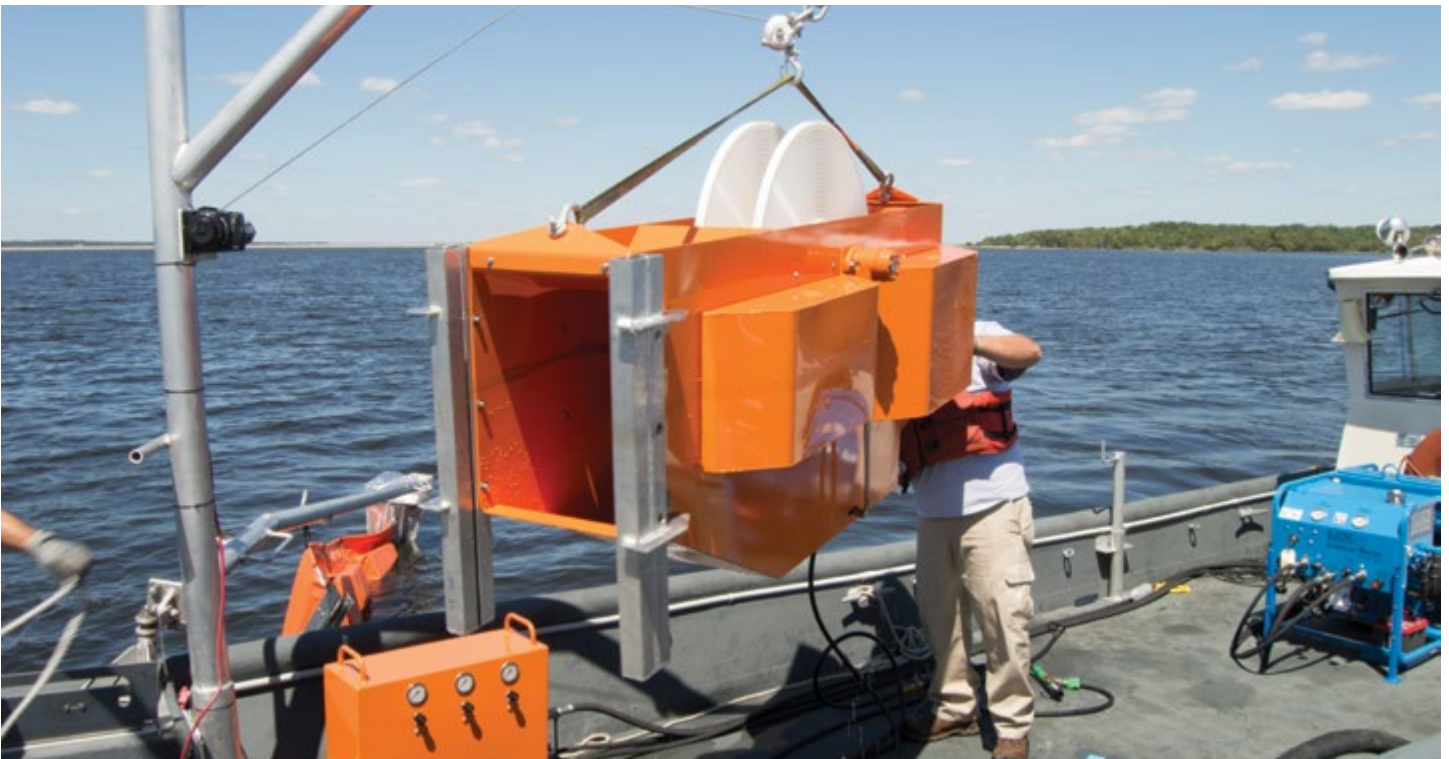

The **ELASTEC X150 Skimmer Launching System** combines the X150 Grooved Disc Skimmer, power pack, boom reel, hoses and BoomVane™ and is packaged to fit into a 20 ft container for rapid global shipment.

X30

The **ELASTEC X30 Grooved Disc Skimmer** features twin discs in a module that can be incorporated into a bow or over-the-side sweep system. Skimmed oil may be contained in on-board tanks or towed in an ELASTEC Towable Bladder. The X30 has been validated at Ohmsett.

X30 Cassette

The **ELASTEC X30 CASSETTE** skimming system utilizes the latest Grooved Discs (patented) for recovering oil from the surface of the water. The X30 cassette fits into skimming vessels equipped with side channel collecting chambers and is interchangeable with a Kvichak/Marco Filterbelt.
