

ELASTEC

Vacuum Systems

Oil Spill Equipment | Floating Barriers | Incinerators

PACS

ELASTEC PACS trailer mounted vacuum systems are designed for removing liquids, solids and sludge from land or water. Less expensive than vacuum trucks, PACS units are approved for highway towing. Models with integral hydraulics can run oil skimmers and pumps, as well as lift the tank vertically to dump contents.

(Skid mounted model shown partially disassembled for shipping.)

MiniVac

The **ELASTEC MiniVac** line of portable vacuum systems are ideal for working in remote areas such as beaches, pipelines as well as industrial locations. There are multiple models and options available for any scenario.

MiniVac I with trailer and high pressure washer.

MiniVac II portable compact vacuum system.

MiniVac III with high power vane pump.

All Terrain Vac features towable ATV chassis.

Electric MiniVac on skid.

Electric MiniVac on chassis.

Vacuum Accessories

The **ELASTEC Vacuum Hopper** includes automatic shut-off, full opening dump valve and retractable legs for easy transport and storage.

The 110 gal / 378 L **ELASTEC All Terrain Vacuum Tank** features fully welded aluminum construction, full opening doors on both ends, two sight glasses for level indication and automatic shut-off with bypass valve to control the vacuum.

ELASTEC DrumIt is a drum-top vacuum head that attaches to a 55 gallon drum allowing liquids and wet solids to be intercepted and stored. It features an automatic shut off and adjustable vacuum relief valve. A ball lifts in the sight glass to indicate when the drum is full. DrumIt fills each drum to a consistent level every time. Dry particulate filter head also available.

The **Duck Bill Wand** can be used to suck up liquids from flat surfaces. The bill can be removed to provide a suction wand.
